

## Global Interconnection and Colocation on the US-Mexico border

## Company Profile

**McAllen Data Center** helps carriers and enterprises connect to major Network Service Providers on the US-Mexico border.

We are the only neutral colocation provider with 100% uptime SLA in South Texas.

Leveraging its strategic locations, **McAllen Data Center** serves as a gateway to the telecom market in Mexico by facilitating American and International carriers to connect to the largest concentration of Mexican carriers in carrier-neutral facilities.

Connecting global network for over 10 years, MDC has positioned itself as a SME and therefore the "Gateway to Mexico" for international networks, content, and cloud providers interested in serving this emerging market.

# Connectivity with major ISPs in the world

The reliability of our infrastructure, coupled with diligence and teamwork with our customers has enabled **MDC** to connect +30 network operators to its Meet-me-Room, featuring the largest concentration of Mexican carriers in the US, and eight of the Baker's Dozen ISPs in the world.

**McAllen Data Center** offers highly available neutral colocation and interconnection services in strategic markets along the US-Mexico border.

## Key Facts

Cross-connect turnaround in 48 hours guaranteed.

International Fiber Crossings, independents and diverse.

Freedom of interconnection with +30 network providers.
