Carrier-neutral Colocation for Networks and Content Providers

Company profile

MDC facilitates the interconnection of major networks and content providers by delivering carrier-neutral colocation services in data centers strategically located along the US-Mexico border.

We connect the world's largest concentration of Mexican networks in our carrier-neutral data centers on the US border with Mexico.

Leveraging its strategic locations, MDC serves as a gateway to the telecom market in Mexico by interconnecting global networks and content providers to the largest concentration of Mexican carriers along the border on the US side.

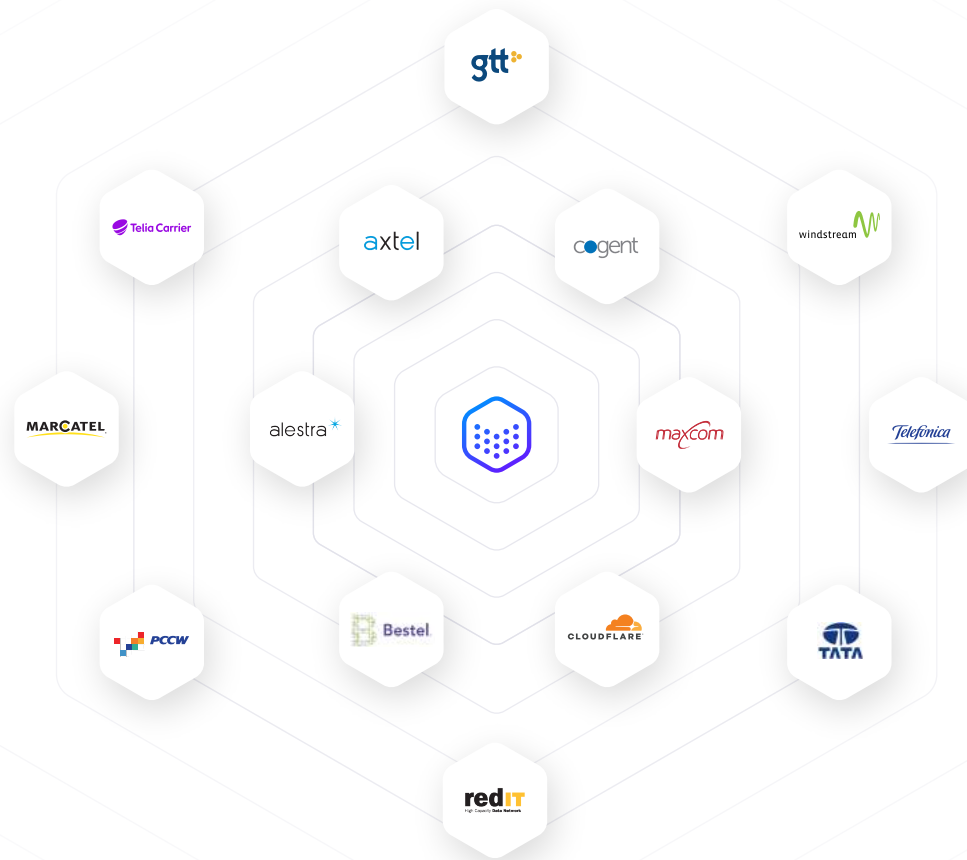

Connectivity to the major ISPs of the world

The reliability of our infrastructure, coupled with our diligent maintenance processes has enabled MDC to bring together over +35 network operators within our facility, including the largest concentration of Mexican network operators inside or outside of Mexico.

This ecosystem also features the MEX-IX, a peering platform for improving connectivity on the edge of Mexico; the first of its kind within the USA.

Key Facts

Cross-connect turnaround in 48 hours guaranteed.

Redundant International Fiber Crossings available in every market.

Carrier-neutral Interconnection with +35 network and content providers.

Multiple locations on the US border with Mexico.

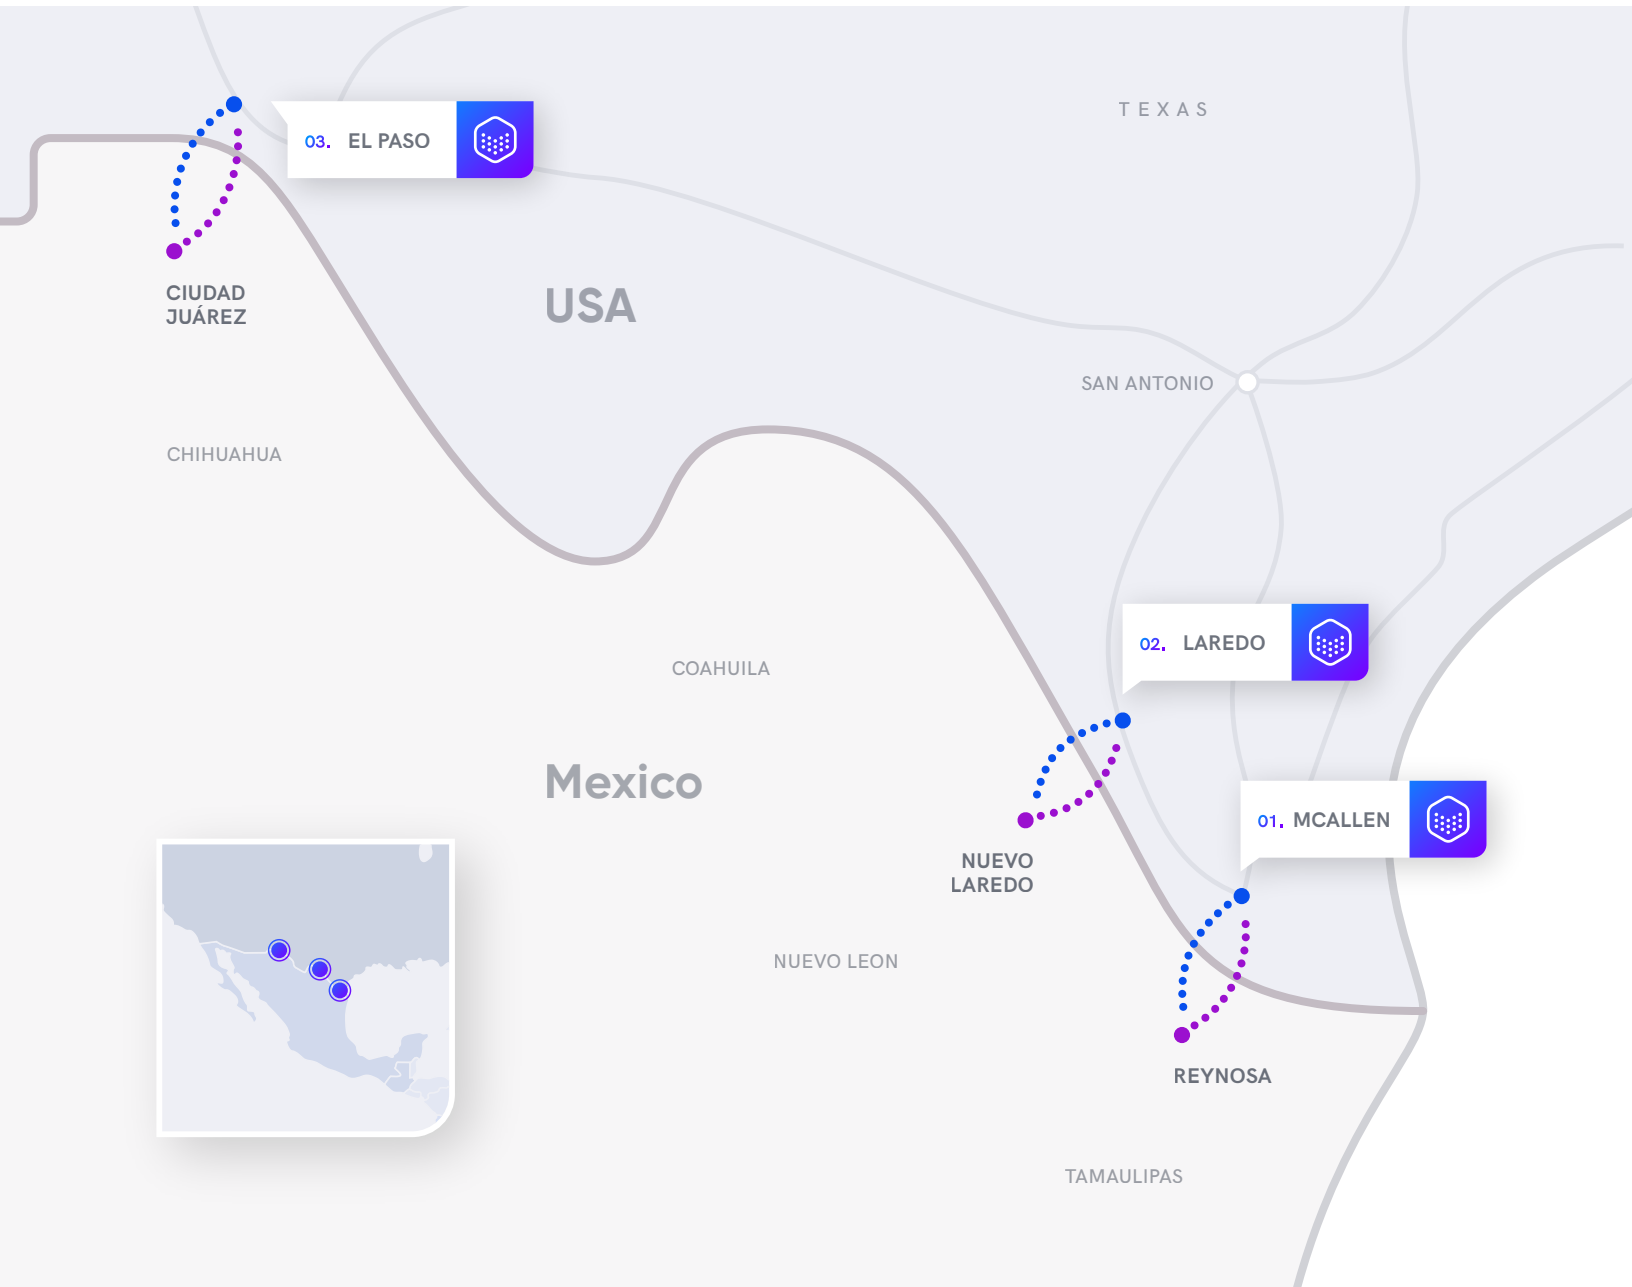

Top-notch reliability with 100% Uptime commitment.

Where carriers connect on the US border with Mexico

MDC Data Centers offer neutral connectivity without limitations or middlemen.

With MDC you can extend your infrastructure to multiple border markets with a comprehensive colocation solution that includes redundant border crossing, reliable colocation and connectivity with an ecosystem of +35 network operators. All the while dealing with a single carrier neutral data center provider; so no impediments.

What our clients say about us

International

“ When Telia Carrier needs something done, MDC works together with us to find a good solution and they deliver it quickly and reliably. Also, they have helped us to build business relationships with a lot of key customers worldwide. ”

Art Kazmierczak

Director of Business and Network Development

Mexico

“ MDC is a strategic partner for Axtel in South Texas. We have achieved significant growth in expanding our opportunities to do business in McAllen and the rest of the United States. MDC provides a more than satisfactory experience in every business negotiation with their best asset, their people. ”

Ignacio Martinez García

Procurement and Sourcing Interconnection

Content Providers

“ Having all the major Mexican carriers in one carrier-neutral data center provider makes performance and security much easier for millions of customers in Mexico. Our mission is to help build a better Internet, and MDC is helping us deliver on that commitment with their reliable connectivity ecosystem and Internet exchange point. ”
